

Dorine Boudewijn (Atelier Bydo) & Waterstof Ontwerp – Chameleon skirt

More and more technology slips into our lives. This skirt uses sensors and lighting to act as a Chameleon to disappear in its surroundings.

This project is a collaboration between fashion designer Dorine Boudewijn of the Atelier Bydo and Waterstof design and was made possible by [Oddstream](#) art & technology platform (also check the [Oddstream](#), events, tip!).

Michiel Klaarwater (Waterstof Design) is involved in [Fablab Nijmegen](#) and [Hackerspace Nijmegen](#)
