12 places available

Twilight Maker Event - Beauty of light

- During the Dutch Design Week Lubomir Simko facilitates a Creator event for creatives 16 years and older.
- The theme is "Beauty of light"
- For the very first time, the HUE Hardware Development kit is available, the perfect start to create your flexible light solution!
- For example the light that is required for a working environment changing into a setting for relaxation and especially the transition between both.
- For this workshop, you need technical basis knowledge to create your own creation.
- If necessary, we will help you to control your own creation with your smart device and the HUE app.
- The expectation is that you will present your creation to the other participants at the end of the afternoon.

Best creation of the day is rewarded with a HUE Lightstrip plus!
