

# Mind Mansion (Hyperspace Collective)

On Monday till Sunday Mind Mansion presents, in collaboration with Hyperspace Collective, the virtual reality applications Mind Mansion and VR-tigo. With those applications, we want to help people coping with their phobias in a better and faster way. We do this by combining VR, gamification, and biofeedback. Together with therapists, we develop in a co-creation case to make the current treatment process more efficient, easy and less time-consuming.
